SURFRIDER

The NGO Surfrider Foundation is a collective of positive activists who act concretely on the ground every day to pass on to future generations a preserved Ocean.

Since 1990, the NGO has been working to **protect the Ocean**, the coast, the waves and its users. During its existence, it has acquired strong environmental skills and developed real expertise in **environmental education**.

Act! with Surfrider is the branch dedicated to services for companies.

ACT POSITIVELY, DRIVE CHANGE FOR THE OCEAN

We invite you, during a seminar or a team building activity, to understand the environmental issues and learn how each of us can contribute to act daily to protect our environment.

Learning paths

0.

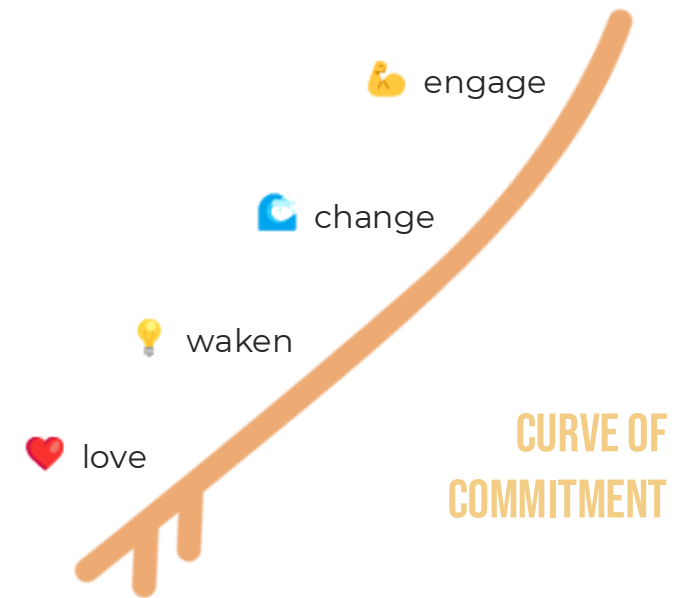

GENERAL RECOMMENDATIONS

Each learning path combines theoretical learning modules and practical activities for comprehensive understanding and concrete actions.

1. We recommend carrying out these learning paths over a period of **1 year**, at the rate of **1 activity per quarter**.
2. For all paths, **progressive reduction** according to the number of activities chosen (10% on the second, 15% on the third, 20% on the fourth)

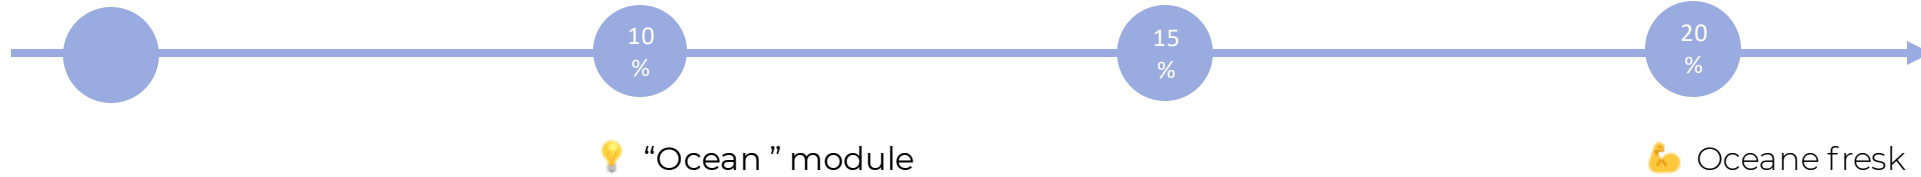

For example, for 30 people on the waste route:

- With course : 8175€ excluding tax
- VS without course : 9360€ excluding tax

1. Cleanup with Olympiades

In teams, you will have to :

- 🌱 **Complete challenges,**
- 🌱 **Take part in quizzes,**
- 🌱 **Accomplish missions.**

This format encourages teams to collect as much waste as possible while having fun and strengthening **team spirit**.

At the end of the activity, the team rankings are announced, with the option [to award prizes to the winners.](#)

2. Other Available Options:

- **Running format** — running while picking up waste.
- **Family format** — involving employees' children.
- **Cleantag** — create an eco-friendly ground marking with Surfrider's message: *"Littering on land is littering at sea."*

ESCAPE GAME "CLIMATE ALERT"

A Surfrider exclusivity : a mobile Escape Game ! A unique experience to play directly from your meeting room, office, or seminar venue.

With **our Escape Game "Climate Alert"**, your employees will find themselves locked in a room and must solve an investigation within a limited time. They will have to cooperate to crack codes, solve puzzles, and unlock safes...

Synopsis

Anna Barrera, a climate researcher, is under threat of abduction. Her groundbreaking work on climate change threatened powerful industries that have orchestrated her abduction.

While law enforcement searches for Anna, your mission is to find the **climate's manifesto** she wrote. By uncovering it, you can make her work public and protect Anna from her captors!

Sneak into Anna's office and start the hunt for the **climate's manifesto**

The Solutions Game

5.

THE SOLUTIONS GAME

This workshop is **best conducted after participating in an awareness activity** (Cleanup, fresk or another activity with **Act!**) to ensure a deeper understanding.

The **Solutions Game** begins with a **role-playing exercise**, where participants receive character cards to step into the shoes of a persona, fostering empathy. Each participant identifies ecological solutions tailored to their assigned profile.

Following this interactive phase, employees will create and develop **an individual action plan** to implement at home, as well as a **collective company action plan**, designed collaboratively with colleagues for implementation at work.

The **Solutions Game** encourages positive action while considering everyone's constraints and needs.

- PLASTIC 

Fresks or “collages” allow participants to discover an environmental topic by mastering it. The collective intelligence facilitation method aims at avoiding a vertical descent of knowledge and, to allow everyone to find their position in the exercise. By tracing over the links, participants can put things into perspective and have a global understanding of the issues.

In collaboration with the Ocean Fresk, the Climate Fresk and the Waste Collage associations.

The plastic fresk is a creation by Surfrider.
